SUMMARY

Product Designer with contract and internship experience in website and mobile app design. I co-designed a physical-digital learning game and am pursuing an M.Des in User Experience after studying Electronics and Telecommunication.

HIGHLIGHTS

- Giggles won Best Project in User Experience Design at MERAKI 2026, the pre-graduation show organised by MIT Institute of Design, MIT ADT University, Pune.
- The syringe redesign passed the first review and was shortlisted for research-paper presentation at Humanizing Work and Work Environment 2026 (HWWE 2026), UPES School of Design, 9-11 Dec 2026. Publication remains subject to jury review.

PROJECTS

ConnectAid: Healthcare App UX | *8 Weeks*

Tools & technologies: Figma, FigJam, Google Forms, Miro

- Co-designed the app in a five-person team, analysed survey and interview findings, and documented interviews. Concerns about virtual care led us to include in-clinic and lab options alongside online consultations in the prototype.
- Built the core Figma design system used for the team's shared screens, including design tokens, reusable components and interaction states.
- Coordinated remote usability testing across 11 tasks. The team recorded 9 findings and made 6 prototype changes from feedback, adding specialty search after participants tried searching by specialty. Category browsing stayed in the prototype.

20 cc Syringe: Human Factors Redesign | *4 Weeks*

Tools & technologies: Figma, Maya, 3D printing

- Led a two-person redesign and developed the selected concept using practitioner research and anthropometric analysis. Worked with my teammate on the Maya model and 3D-printed prototype.
- Designed a butterfly flange and concave thumb support to address slipping grips and thumb pressure. Used full rings for major scale marks and short minor marks, aiming to keep the scale readable without crowding.
- Nurses rated 21 Kansei attributes subjectively. The redesign averaged 5.62/10, compared with 4.14 for the existing syringe. Effort ratings were unchanged and perceived dose accuracy was rated lower; both need further testing.

Giggles: Physical-Digital Learning Game & Teacher App | *6 Weeks*

Tools & technologies: Figma, Arduino C++, ESP32, RFID (MFRC522)

- Co-designed a physical-digital learning game for autistic children. Led and implemented all electronics and game logic.
- Built an ESP32 prototype connecting RFID cards, touch sensors and shape buttons to phone-based questions over local Wi-Fi. Wrote Arduino C++ for turn-taking, question handling, retries, hints and LED feedback.
- Helped with visual decisions for the game display and teacher-app mockups. The mockups cover session setup and individual progress review, showing accuracy, attempts, response time and hint use.
- The game was tested with teachers and children.

EXPERIENCE

Product Designer (Contract) | Baragaun | *Nov 2023 - Jan 2024*

- Conducted competitor and secondary research for a responsive website, designed layouts and handed the designs over for development.
- Created wireframes, mockups and an interactive mobile-app prototype. Presented user flows to stakeholders for review.

Product Design Intern | Novae Avenue | *Jul 2023 - Aug 2023*

- Designed a data portal, landing page and brochure for customers of a 4G dashcam product.
- Redesigned the app's core and secondary customer-facing screens.

SKILLS

UX Design: Information Architecture, Interaction Design, User-Centered Design, User Interface Design, Design Systems, User Flows, Design Iteration, Data Portal Design

Research & Evaluation: User Interviews, Contextual Inquiry, User Research, Survey Design, Research Synthesis, Competitive Analysis, Persona Creation, Journey Mapping, Heuristic Evaluation, Usability Testing, Eye-Tracking, NASA-TLX

Design Outputs: Wireframing, Prototyping, Interactive Prototypes, High-Fidelity Screens, Infographics, Illustrations, Animations, Design Handoff

Design & Research Tools: Figma, ProtoPie, Illustrator, Photoshop, Miro, FigJam, Google Forms

AI Tools: ChatGPT, Figma Make, Claude, GitHub Copilot, Gemini, Midjourney, Perplexity, NotebookLM (Google), Antigravity, Google Search (AI Mode), LLM Arena

Development: CSS, HTML, Visual Studio Code, GitHub

Collaboration & Working Style: Analytical Thinking, Problem-Solving, Cross-Functional Collaboration, Communication, Planning & Organising, Leadership, High-Pressure Resilience, Stakeholder Communication

EDUCATION

MIT ADT University, Pune | *Jul 2025 - Jul 2027 (expected)*

M.Des in User Experience | CGPA: 8.6/10 (current)

SSIPMT Raipur | *2019 - 2022*

B.Tech in Electronics & Telecommunication | 72.72%

CERTIFICATIONS

- **Google (Coursera):** UX Design Process | **Internshala:** UI/UX Training | **GrowthSchool:** UX Workshop

University of Colorado Boulder (Coursera)

- Graphic Design Elements for Non-Designers Specialization
- Basic Elements of Design: Design Principles and Software Overview
- Textual Elements of Design: Fonts, Typography, and Spacing
- Print and Digital Elements of Design: Branding and User Experience
- Graphic Elements of Design: Color Theory and Image Formats

California Institute of the Arts (Coursera)

- Fundamentals of Graphic Design
- Introduction to Imagemaking
- Ideas from the History of Graphic Design
